Dear Reader,

This second newsletter is to inform you about the activities and products that will be developed during the life span of the Sprinter pro driver ERASMUS+ project. This newsletter will give you the updates about the project and the activities already carried out by the partners.

You will read about:

- Intellectual Outputs and progress of the project activities
- First Meeting in Baden
- Second Meeting in Madrid
- Future activities

The European Commission support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein."

This project has received grant support from Movetia funded by the Swiss Confederation. The content reflects the authors' view and Movetia is not responsible for any use that may be made of the information it contains."

## Results of the project

Partners have finalised the work on the first two results of the project: the LCV Competence map and the collection of mobile technologies for training of LCV drivers.

The Competence Map collects common European competences and knowledge which a Light Commercial Vehicle driver should acquire for his/her profession.

The LCV Competence Map was created through administering online questionnaires to drivers and trainers, in order to understand which were the most important competences for companies and to collect further information on online training.

Furthermore, Output 2 has been completed. It is a collection of mobile technologies for learning. Apps, softwares and programmes which could be useful for drivers have been shared on a Google+ community (you can visit it on this link <https://plus.google.com/u/0/communities/108065324565791322448>) the partners have collected tools that trainers can use and suggest during the training and that can support drivers' working activities. For example there is an app which supports drivers in first aid, or an app which constantly checks fuel prices etc.

Partners are now working on Output 3, that is the training path for e-learning use. A 32-hour training course will be created, and web-based learning materials will be provided, including collected tools in O2.

## First Project Meeting

The first project meeting was held in Baden (Austria) on 6-7 of November 2017. In this meeting, partners discussed intellectual outputs, outcomes, results and timetables. Partners also discussed the activities to be carried out, such as the creation of the website, social media pages, leaflets and newsletters.

## Second Project Meeting

The second project meeting was held in Madrid (Spain) on 5-6 of June 2018. In this meeting partners discussed about the activities already completed, as the competence map and the collection of tools, which have been presented, discussed and commented. Partners discussed also about next activities for the future outputs to be carried out (O3, O4, O5) which are the development of tools needed for the training path, the training methodology and transferability guide, and the implementation of the stakeholder platform.
